**FREE RESPONSE:**

- I like this class a lot. Danelle would help us out all the time if we had questions. Always had answers when you couldn’t figure out your calculator. I love how we do group work. She is a very good teacher. You’ll have warm fuzzies! 😊

- I took AP calculus last year in my senior year of high school. The course was mostly a good review for me and also fill the core requirement for my major. Very good and easily understandable teacher. She knew that for some students the class was strenuous and took strides to make it fun. Loved the class 😊

- She makes the class interesting and I hate math but like this math class.

- I feel that the teacher really wanted us to learn and really made sure that we understood it. She is very approachable so its easy to ask questions but we should be able to write on the front and back of a piece of paper to conserve how much we use and to help be more organized.

- The instructor was very clear and did not teach in an unhelpful manner. The text fit accordingly with the course and helped greatly however I did not like the online Moodle account. Too confusing and not helpful.

- The instructor did a very good job. The textbook was a pretty decent one. Pretty easy to follow.
• I like Ms. Clarke’s teaching style. I thought it was very effective and she explained the material well.

• Danelle Clarke did a great job in teaching this course. There was only 1 section that I felt she didn’t do the greatest on and that was section 5. I did not like how she did her reviews though. I wish she would have given the answers so that I would have known if I had done the problem right or not.

• I took math 096 over the summer so I was prepared for the course but if I hadn’t I don’t think Ms. Clarke would have helped very much. She was easy to talk to and personable/approachable. I like the random facts of the day. Hate how much paper I waste in homework.

• The exams would cover some of the material but not all of it. It would also include material from past exams that could throw off the test taker who is not prepared for some question from the past.

• Book was helpful but I never did practice problems. Thanks.

• Ms Clarke did a very good job teaching. She loves what she does and keeps us awake! Thanks.

• The book was OK but she explained everything very well.

• Instructor works too fast. Assignments took a long time to be returned.

• I think the instructor could slow down a little when taking notes on the board. I did not like the textbook.

• She was a very good teacher and I like her a lot.

• She has a very clear teaching method.

• The text had a lot of typos and was sometimes organized in a way that was hard to understand.

• The course was very enjoyable.

• I thought she was a good teacher who genuinely helped students. I hate the book. I want a book that puts it plainly, not in math terms that you can’t understand.

• I didn’t learn a lot because I already knew most of the material in this course. I like that the textbook was cheap but it had a lot of errors in it and mine fell apart half way through the semester.

• Danelle Clarke is an amazing math teacher. She’s fun and wants every student to learn the material.

• Great teacher but the book was terrible. I went to her many times because the book didn’t make sense.

• I enjoyed the class. I feel like I’m learning a lot. The teacher makes the curriculum relatively easy to understand!😊
• Very well organized teacher.

• It was a good course with a good teacher.

• I really like the professor and her style of teaching.

• The instructor did an excellent job explaining the material in class. She made sure to do every little step and several examples as well as in class problems. The best math teacher I have ever had: The text book was good and cheap too. The assignments were effective and not excessive.

• Overall, a very enthusiastic, fun and informative teacher. She taught the material very well and kept the students attention. If I had to take more math, I would definitely have her class again! Don’t change a thing! Woo!

• The instructor is entertaining and good. The book needs to go. There are poor examples and is hard to follow for guidance while doing homework. I would rather pay more. The homework grading policy is the most strict of any math class. I did my homework regularly and always received poor grades.

• This class was very helpful. Although the majority of the material was review from high school, she covered and explained it very well and in an easy to understand way. Danelle Clarke was one of my best professors! I recommended her to my friends.

• Great teacher, homework is graded and even if we do it and try we might still fail the assign. More extra credit would be nice. Loved useless facts!

• I like group-work and facts of the day. I thought the teacher was very good but I’m just bad at math.

• She should have gone over some homework problems before we turn it in. Goes too fast in class.

• Danelle is a great math teacher, her style is effective and I grasped almost every concept, which is unheard of. The textbook was ok but kind of confusing, but paired with Danelle’s teaching it was much better. Overall I genuinely enjoyed math 120 but only b/c of Danelle and her teaching.

• The teacher was well prepared and I learned a lot. Book needs better examples.

• Maybe assign more problems to force students to practice more.

• Everything is great but the text.

• I think Danelle is a great math teacher. She has a great way of effectively communicating procures and keeps thing fun and interesting.

• I really like the teacher. She was very organized and gave really good notes. Her notes were easy to understand and very clear. I didn’t like the book very much. If you missed class the notes and examples were hard to follow.
• Instructor was effective but made students feel as though they were in high school.

• Textbook: not clear, nor easy to learn from. Instructor: good teacher, teaches class effectively.

• Amazing instructor, my favorite so far at UNR. Made math as easy as it could be.

• She is a great teacher and really knows how to make students understand the material and I hate math so that means a lot!

• This class alone is the reason I’m considering dropping out of college! Now I won’t have the millennium.

• Good, easy to follow class. Easy step by step learning process.

• I thought the teacher was great and text was pretty good; but I didn’t like her grader.

• She was a very good teacher and I like her a lot. She made things interesting and wanted us to learn it.

• I thought that the teacher was great and did a very good job at making the class as entertaining as a math class can be. I just didn’t like the text and felt that it did a poor job at explaining concepts.

• I thought the teacher was very informative. She explains things very well and clear. I hated math until I had her. I think some of the points taken off of the hw and exams were a little much. Ex-little mistakes were deducted with a lot of points.

• I thought Danelle was a good teacher and explained things well, the group work helped.

• The instructor was very articulate in her explanations although the book was not so helpful. I missed a few days and had trouble catching up because the book was so vague.

• Teacher was funny and interesting. Tried to relate to us well. “Useless facts of the day” were fun.

• I thought the professor was wonderful —very interesting and thorough. Explained everything clearly in common terms. Text was missing a few diagrams.

• She was a great teacher. She taught all the lessons very well and made them easy to comprehend. I like the text because even if I missed a day of class, the book was good enough to almost teach me the lesson I missed.

• Like professor’s teaching methods; she explained material in a very understandable way. Good job!

• Ms. Clarke is a good math teacher. She goes slow and provides pretty good examples of problems. I didn’t like the text at all but I appreciated it because it was cost effective.

• If I lose my scholarship it is because of this class.
• Math is not my favorite but she did a good job teaching.

• Good teacher!

• Danielle is a very good Math Teacher! She explained everything well and was always very helpful and fun.

• She was very fun, especially with her interesting facts. She explained things very clearly and made math as fun as she could.

• Math 120 is the best math class I have taken yet. I have learned applications that will actually be used in my life and Mrs. Clarke was a terrific teacher that got everything across to me.

• Clarke is a very good instructor. I would recommend her to any student taking Math 120. I love the price of the text.

• Professor Clarke was a very good teacher. I learned a lot from her this semester. She made learning much more easy than the text book. The text book did’ not help me at all.

• I’m generally a terrible math student but she made it seem so simple. I definitely struggled more in my 096 class.

• I liked Danielle she made math a little easier.

• I think our class was okay and I did learn a fair amount of stuff from her. I did not like the length of the class.

• Instructor taught the material very well. Textbook was effective. Homework was given in appropriate amounts. Tests were difficult and the material on the tests did not always follow the study guides.

• Good class, kept my attention the whole time. Learn a lot.

• The instructor was very effective with her teaching structure making the class a fun learning environment.

• I enjoyed the class. I often have difficulty with math. Ms. Clarke offered an interesting approach bringing relevancy to math in everyday life. She was very helpful and the class was interesting.

• I love the price of the textbook. Professor Clarke was an excellent teacher.

• I feel that Danielle was one of the best math teachers I have had. She explains the math material very well. She makes sure that everyone understands. The useless facts save me. The text was good.
