Results for Mathematics Department Teaching Assistant Evaluation
(By Participant)

Name of TA: Andrey Sarantsev
Your name: Boris Solomyak
Your e-mail: solomyak@uw.edu
Quarter: Winter
Year: 2012
Course number: Math 525

TA's classroom experience level: Second term in classroom

Grading, Other responsibilities (if any):
Office hours

Date of observation: Throughout the quarter

Summary evaluation
The TA's teaching is very good.

Report
Andrey Sarantsev has been a grader in the Real Analysis graduate sequence Math 524/5/6 throughout 2011-12.

I am happy to report that Andrey has been doing an excellent job grading the homework. He has been always extremely reliable and dependable, and did the grading efficiently and in a timely manner. Andrey provided useful feedback to the students when something was wrong. In addition, Andrey held office hours which were well attended. Moreover, he provided written (in LaTeX) solutions of most of the assignments, which was actually not a requirement of his job; this was very much appreciated by the students.

In the Autumn Quarter there were some complaints that Andrey's grading was a bit too harsh, so I discussed this with him and suggested some small modifications in the grading scheme. Andrey immediately took this into account, and his grading in the Winter and Spring quarters was regarded by the students as very fair.

In conclusion, I would like to thank Andrey for an excellent job; it was a pleasure working with him.

If one or more aspects of the TA's teaching is
No response
not satisfactory, give details below. This will indicate there are problems serious enough to require follow-up by the TA coordinator or Lead TA. If you merely intend that the TA work on self-improvement of one or two points, please list your suggestions below but give a summary evaluation of “satisfactory”.

Question:
Suggestions for improvement
(recommendations may be included in the report above, or detailed separately here).

No response

Question:
More serious problems that need immediate attention:
